Dear Customer:

Many growers and canners will soon be making spring purchases of their needs in all kinds of vegetable plants. Rural people should be getting busy planting, growing and really getting ready to set out vegetable plants. When ordering your next vegetable plants, seriously consider using our cabbage, tomato, potato, cauliflower, pepper and other varieties of plants. We feel sure that they will pay you rich dividends. It is our firm belief that we have the best available plants that any plant growers and shippers can offer you. We carefully hand pick our plants and they represent "the cream of the market". We furnish leading farmers, canners, gardeners, etc. and are offering our plants to a number of leading people like yourselves.

It's only fair to tell you what customers think of our Company and our plants, so you can hitch your own buying or purchasing to that friendly feeling. Your profits are swelled from an inexpensive order of plants from us. Put your money to work for you by investing in some of our fieldgrown plants. We have been in this business for over 25 years and our parents and grandparents were in the plant business before this time. We can furnish references and recommendations.

Our crop will be planted on newground as much as possible, and all seed are bought from reliable seed companies. Here's a convenient order blank at the bottom of this sheet which we will be glad for you to fill out and sign and return to us with check, money order or cash, to pay for the plants ordered. We feel like our old customers are really a part of our Company and we are grateful for new customers, too. We appreciate your many favors, and your patronage, and your many kind words to friends.

And remember whenever you need plants, a hearty "Thank you" awaits you at our plant farms.
